GOLDSPEED EVO |

Performance and ergonomic design

Stern Weber's Goldspeed Evo handpiece range has been conceived to cover a complete range of needs in all fields of dentistry, from restoration to implant surgery and endodontics.

The performance, manoeuvrability and lightness of the handpiece and the contra-angle ensure maximum operating comfort, even during the most delicate procedures.

Manufactured according to the highest standards of micro-mechanics, Goldspeed Evo instruments are, thanks to their exclusive design, appreciated for their exceptional working precision, excellent visibility of the operating area, extremely low noise, optimal balance on the wrist and good grip; they can be used on all micromotors with a standard ISO 3964 coupling.

All Goldspeed Evo handpieces can be heat-disinfected and sterilised in a steam autoclave at 135 °C.
